client relationship

I personally found the client brief a success. Amber always kept in contact and followed up on questions straight away. There were a few minor difficulties, the deadline was made quite urgent and I wasn't given as much time as I would have liked, also quite a lot of changes were made once the poster was created but nothing I didn't expect. Overall I found Amber an ideal "client" to work with and I thank her for her patience and good communication skills.

Thankyou!
