About

Purchase

Perth City Farm
1 City farm Place
East Perth WA
6004

City Farm will collect used coffee grounds from the city's cafés and grow gourmet oyster and shitake mushrooms in them. Once the mushrooms are harvested, the remaining mushroom roots and spent coffee grounds will be sold as compost to garden centres. Once critical volume is achieved, City Farm will also sell mushroom kits directly to the consumer. Our goals are threefold:

1. Divert an appreciable amount of organic waste from landfills.
2. Create awareness that waste can be a resource.
3. Offer a model of sustainable business practice to the community at large.
